Inheritance II: Understanding Inheritance

Implement a **Building** class and derive a **Hospital** class from Building and implement a **Doctor** class and used it in class Hospital. Derive **Eyes Hospital and Birth Hospital** classes from Hospital. Write appropriate interfaces for each class and write a drive program to test your classes.

Relationships:
- "Hospital is a Building"

- "Eyes Hospital is a Hospital"

- "Birth Hospital is a Hospital"

- "Hospital has a Doctor"
